## COMPANY

### **A PURE RIDE COMPANY**

Rip'n Wud skis is a family owned, independent ski company born in Haute Savoie Mont-Blanc, France. Rip'n Wud skis is dedicated to its strong Quality image that has been developed throughout the world of free skiing.

Our dedication and passion for skiing in the high alpine, is what motivates us in our designs, eco material research & development.

Today, Rip'n Wud skis have reached the forefront of the free skiing market as a durable, easy riding, yet high performance, top quality, eco friendly ski brand.

### **RIP'N WUD HISTORY**

Skis designed & built for skiers by skiers. Rip'n Wud has always been focused on the outer limits of ski shapes, designs, quality and eco material development. Rip'n Wud ski Development began in 1997 designing, building & testing new shapes in the world's biggest alpine playground, Chamonix Mont-Blanc-France.

Rip'nWud skis has maintained its position outside of the industry brands for more than two decades, due to our high quality, durability, high performance and excellent customer service.

### **HANDMADE SKIS · A LIFETIME OF EXPERIENCE**

Rip'n Wud™ Quality built into every pair of skis, using classic materials with Experience. Rip'n Wud Skis are produced with handmade precision and under the strictest quality control with the best Eco material and Technology.

Each pair of skis is a precision "Hand made" product that allows skiers of all levels to ride effortlessly on or off the piste in all terrain and BIG MOUNTAIN riding conditions. Rip'n Wud™ Skis is a ® Trademark.

### **BACK TO NATURE · RESPECTING OUR ENVIRONMENT**

Rip'n Wud skis are built with 100% White ash wood cores with the top sheet surfaces made of walnut and/or wild cherry wood, all from replanted forest. We produce all our ski models with the best Eco materials available. All of these RAW materials are then put into our production and then we produce by hand the sandwich laminated wood cores in full-length tip to tail, our presson core construction is responsible for 80% of the characteristics of each pair of handmade skis. Rip'nWud "LAM Technology".

All of our wood cores are precision hand shaped, tuned and balanced before entering the final press stage to ensure each of our skis have an equal and balanced flex from tip to tail for easy smooth handling on or off the piste.

## NEW BOREALIS SKI COLLECTION 2023/2024

Our New Borealis Collection has been inspired by our freeride expedition to the north pole where we explored the unknown, traveling under an incredible sky of unimaginable colors streaking the heavens above.

A feeling of total freedom, lost in an untamed environment completely unplugged from society, and at the same time and moment, fully connected with its extreme nature and its elements.

The Borealis collection offers an array of different colors and shapes to give the rider freedom of choice.

All Rip'nWud skis are Precision handmade to give the rider a sensational feeling, high performance, and stability he or she has been looking for.

### **SL CARVE PRO 71**

**160 · 165 · 170 · 175 · 180 · 185cm | Piste**

Combining excellent grip and high performance, this is a perfect ski for skiers who ski primarily on piste. The SL Carve PRO has a unique character: in shorter lengths, it skis like a slalom ski. As the ski gets longer, it offers the grip and stability more like that of a giant slalom ski.

#### **SL CARVE 71 PRO**

Our SL CARVE PRO 71 is a perfectly balanced high performance carving ski to give the rider short to medium-radius turn performance.

### **SL CARVE 71 Light**

**160 · 165 · 170 · 175 · 180 · 185cm | Piste**

Combining excellent grip light weight and high performance, this is a perfect ski for skiers especially women who ski primarily on piste. The SL Carve 71 light has a unique character: in shorter lengths, it skis like a slalom ski. As the ski gets longer, it offers the grip and stability more like that of a giant slalom ski.

### **SL CARVE 74**

**164 · 171 · 178 · 185cm | Piste**

Built with only one Titanal layer, with its softer flex, this ski is the perfect "combi" ski for the lighter weight skier or person who prefers skiing at more moderate speeds. You can stand on the middle of this ski and let it do the work and make long-radius turns with ease or push the ski and make short radius turns. This ski will excel in softer conditions.

### **SL CARVE 77**

**156 · 163 · 170 · 177cm | Piste**

Our SL CARVE 77 this ski embodies what people are looking for in a one-quiver ski: the ability to make turns of all sizes, grip and stability on groomed terrain, and versatility to ski anywhere. One of the widest in our Carve collection, the SL CARVE 77 is a great choice for the advanced intermediate skier looking to improve as well as the advanced skier who is looking to ski at more moderate speeds.

### **WUD ROCKER 81**

**156 · 163 · 170 · 177cm | Piste 80% · Off Piste 20%**

The WUD ROCKER 81 is our narrowest ski in the WUD ROCKER collection. Our WUD ROCKER offers skiers a great combination of grip when carving and versatility to ski on both groomed terrain and off the slopes. Our WUD ROCKER 81 model offers more of a "carving" orientation, with a slightly stiffer flex pattern and a smaller progressive rocker in the tip than our other WUD ROCKER models. Handmade sandwich construction, The Wud Rocker with 81mm under the boot will provide solid grip, great stability for skiing on or off the slopes.

### **WUD ROCKER 84**

**161 · 166 · 171 · 176 · 181cm | Piste 50% · Off Piste 50%**

The WUD ROCKER 84 offers skiers a great combination of grip, power, and versatility to ski on both groomed terrain and off-piste conditions. Unlike its brother ROCKER 81, this model has more tip rocker to give the rider easier turn initiation and flotation when skiing in crud and powder. Handmade sandwich construction, the WUD ROCKER 84 provides solid grip, great stability and easy handling in demanding snow conditions.

## PREMIUM SKI COLLECTION 2023 / 2024

**RESPECTING OUR ENVIRONMENT, A COLLECTION LIKE NO OTHERS...**

**NATURAL - AUTHENTIC- TIMELESS**

Rip'nWud is and always will be the benchmark of high performance, durable handmade eco wooden skis. Our premium collection was designed with one goal in mind, to give back to nature what nature has so generously given to us, by building skis that give skiers the best sensation and the most long lasting durable skis available on the market today.

Handmade from 5 different types of the highest quality ECO certified wood coming from replanted forest, Our Premium collection is built with 100% white ash wood, wild cherry wood, Acacia wood, AFC light wood, and American black walnut wood. Rip'nWud has set a whole new standard in ski building from the beginning... Since 1997
